

**Amendments**

Please amend the application as follows:

**In the Claims:**

Please amend claim 1 as follows:

- a1
1. A pressure sensitive adhesive composition comprising a copolymer comprising
- (a) at least one A monomer selected from the group consisting of an alkyl acrylate containing 4 to 12 carbon atoms in the alkyl group and an alkyl methacrylate containing 4 to 12 carbon atoms in the alkyl group; and
  - (b) pyrrolidonoethyl acrylate.

Please cancel claim 6.

Please amend claim 28 as follows:

- a2
28. A method for transdermal delivery of a drug comprising the steps of
- (A) a step of providing a composition comprising
    - (i) a copolymer comprising
      - (a) at least one A monomer selected from the group consisting of an alkyl acrylate containing 4 to 12 carbon atoms in the alkyl group and an alkyl methacrylate containing 4 to 12 carbon atoms in the alkyl group; and
      - (b) pyrrolidonoethyl acrylate; and
    - (ii) a drug in an amount such that the composition delivers a therapeutically effective amount for the indication being treated; and
  - (B) a step of applying the composition to an external part of the human body for a period sufficient to achieve the desired therapeutic result.
